

Operations Summary

The systems, the staff, and what transfers at close

CityPlace bnb is already running. The property management system, pricing engine, reservation manager, cleaning bench, vendors, and documentation are installed and transfer with the sale. A buyer takes over an operating extended-stay business that is easy to run remotely, not a project to build from scratch.

OWNER ROLE AT A GLANCE

WEEKLY OWNER TIME

~2 hrs

Less than two hours of oversight: pricing check-ins, spend approvals, and exceptions in the existing Slack channel.

HOW IT IS RUN

Fully remote

No on-site manager for roughly four years. The owner has not lived in Dallas at any point during that period.

OPERATING ROLES

Already staffed

Reservation manager, cleaning bench, handyman, and automated pricing are in place and included in a sale.

Ten suites at 3604 San Jacinto Street have been run for roughly four years without an on-site manager. The owner has not lived in Dallas at any point during that period. What makes that possible is the stack set out on the next page, and every piece of it is included in a sale.

01 HOW THE WEEK ACTUALLY RUNS

The manager holds the front line

Every guest message, across every channel, goes to the reservation manager. She has held the role for four years, knows the building and the guest mix, and orders supplies without being asked. The owner is not in the inbox.

Pricing runs itself

RoomPriceGenie moves nightly rates against demand and the competitive set inside Cloudbeds. Rates are not set by hand.

Turnovers are a bench, not a person

A lead cleaner works from documented checklists, with backups on standing call. Smart locks mean no key handoff, and Ring cameras at each unit give an entry record when a dispute needs one.

What is left is ownership

About two hours a week: reviewing pricing and occupancy, approving spend, and handling exceptions in the Slack channel where the whole team already coordinates.

02 TRANSITION

The seller offers an optional two-month transition support contract.

Available at the buyer's election, to hand over the stack, the vendor relationships and the operating rhythm rather than leaving the buyer to reconstruct them. Terms are negotiable as part of the transaction.

03 THE OPERATING STACK

Everything here transfers

Nine systems and relationships run the property. None of them are personal to the current owner, and all of them convey with a sale.

SYSTEM OR ROLE	WHAT IT DOES	STATUS
Cloudbeds PMS	Property management system of record. Holds reservations, rates, guest data and channel connections; also runs the direct-booking engine.	TRANSFERS
RoomPriceGenie	Dynamic pricing. Adjusts nightly rates against demand and competitive set without manual intervention.	TRANSFERS
Reservation manager	Offshore, remote, four years in the role. Handles all guest contact across every channel and orders supplies. The single most important operational relationship in the business.	TRANSFERS
Lead cleaner & backup bench	Primary cleaner with a standing bench of backups, so turnover coverage does not depend on one person.	TRANSFERS
Handyman	Established local relationship for maintenance and repairs across all ten units.	TRANSFERS
Smart locks	Contactless entry with per-guest code logs. No key handoffs, no lockbox, an audit trail of every entry.	TRANSFERS
Ring cameras	One per unit entrance. Security coverage and dispute evidence.	TRANSFERS
Slack operations channel	Where the manager, cleaners and handyman coordinate. Four years of searchable operating history comes with it.	TRANSFERS
Checklists & training	Documented turnover checklists, standard operating procedures and training materials, so a new owner is not rebuilding the process from memory.	TRANSFERS

04 DISTRIBUTION

Channel mix

Inventory is distributed across every major channel through Cloudbeds, plus a direct booking path that carries no platform commission.

- Airbnb
- Booking.com
- Expedia
- VRBO
- Trip.com
- Direct, via the Cloudbeds booking engine

Reservation-level earnings broken out by channel are available in the deal room.

05 DEMAND

Where the guests come from

Baylor medical district

A two-minute walk to Baylor University Medical Center, a 914-bed Level I trauma center. Families of patients, traveling clinicians and visiting specialists are the anchor demand, and it does not follow a leisure calendar.

Corporate housing

Full kitchens and 550 sq ft suites support 30-plus-day stays. Stays of 30 days or longer are exempt from Texas hotel occupancy tax, which changes the economics of that segment materially.

Downtown, Deep Ellum, Uptown

Leisure and business travel into central Dallas fills around the medical and corporate base. Free parking, pet-friendly policy and a private dog park differentiate the property against downtown hotel inventory on both price and practicality.

06 REGULATORY

Short-term rental regulation in Dallas

Dallas passed short-term rental ordinances in 2023. Those ordinances have been the subject of ongoing litigation, and enforcement has been repeatedly challenged in court. Separately, the property won its own platform appeal on all four points in February 2025.

This is stated as a matter of record, not as a legal opinion or an assurance of any particular outcome. The regulatory position is a diligence item, and buyers should evaluate it with their own counsel. It is also worth noting that a meaningful portion of the property's demand comes from 30-plus-day corporate and medical stays, which sit outside short-term rental frameworks entirely.

07 SCOPE

What is included in a sale

The sale is the real estate, the operating business, and the staff and vendor relationships that run it. That combination is why the opportunity prices above brick-and-mortar alone. Furnishings, systems, and documentation support the business; detail on those follows.

- 01 Real estate.** The building and land at 3604 San Jacinto Street, Dallas, Texas 75204: ten renovated 1BR/1BA suites, private dog park, and parking.
- 02 The operating business.** Cloudbeds, RoomPriceGenie, channel connections and listings, smart locks and code logs, Ring cameras, the Slack operations channel, and the operating rhythm built over roughly four years.
- 03 Staff and vendors.** Introductions to the reservation manager, lead cleaner and backup bench, and handyman. These are independent relationships; the seller introduces them, and the buyer contracts with them directly.
- 04 Furnishings and documentation.** Units convey furnished so reservations can continue without a re-fit; checklists, standard operating procedures, and training materials as used today.

08 NEXT STEP

The deal room

What is in it

- Reservation-level earnings by channel
- Roughly four years of monthly P&L
- June 2025 appraisal (full report)
- The lender term sheet
- Full systems documentation
- 2026 tax records

How to get access

Deal-room access is granted to qualified buyers following a short introductory call. Tours (in person in Dallas or live on video through the building) are booked from there.

Reply to the email this document arrived with, and include a couple of windows that work for a call.

DISCLOSURE

CityPlace bnb is offered through the owner's listing arrangements; the property is listed with Marcus & Millichap. The owner holds a Texas real estate license. All financial and operating figures in this document are owner-provided and independently verifiable in diligence; buyers should verify all information independently and conduct their own investigation before acting. Nothing in this document is an offer to sell or a solicitation of an offer to buy, and no representation or warranty, express or implied, is made as to the accuracy or completeness of the information contained here. Statements regarding regulation and litigation are descriptions of publicly reported matters, not legal advice.
